Bee Happy Plants Ltd Newsletter

Apologies to all of you who received our test newsletter with the wrong web address. By way of apology we would like to offer ALL our new customers a blanket 10% discount on first orders (for those not already receiving the beekeepers members' discount)...

A warm welcome from Bee Happy Plants Ltd to all, many of whom we hope are (or may become) members of any of the regional BBKA's and will therefore qualify for our offer of 20% discount off our direct price (20% less than the prices shown on the website).

We are proud to announce that we now have ready, at our nursery, for sale thousands of top bee plants. These are organically raised to Soil Association standards, nurtured and cared for to the highest standard without any harsh chemicals used that may compromise bees' health, our health or that of beneficial insects.

We would like to add that many of our bee plants are also popular culinary or medicinal herbs, and we are sure the bees will be happy to share them with you (as long as you let them go to flower – for the bees to forage).

For us to be able to provide this service, and to deliver high quality plants at low prices,

we need to sell in bulk (with minimum orders of £150 - cutting down time wasted in packaging up and posting plants individually, as you may appreciate), conversely, bulk orders can be safely delivered either to your door or an arranged 'drop off' point, by us.

You can buy small plants more economically in packs of 10 of the herbaceous perennials (bees need to find drifts or patches of productive flowers for there to be appreciable amounts of forage, as they would find in the wild) or more mature in 9cm pots. Of the larger-growing shrubs or trees, these can be purchased in 9cm or 1 or 2 Litre individual pots.

For this 'minimum ording' to work, we suggest you do a spot of 'networking' with friends, family, neighbours or fellow beekeepers and gardeners. You could also even sell some on at a market stall, village fete or fair, and charge a small mark-up.

We also welcome orders from garden centres and trade (please ring 0845 471 4020 or email info@beehappyplants.co.uk to negotiate wholesale price). We can provide packs of 20 in tough carry-trays, with perhaps 4 plants of each of 5 species, or 'gift-packs' of 6 x 9cm plants in a sturdy carry-home basket tied with a yellow ribbon. Each come with labels and colourful 'Bee Happy Plants Ltd' (waterproof) stickers.

Leptospermum scoparium (Wild New Zealand Alpine Manuka) – An absolutely star bee plant fresh from the pristine New Zealand wilderness. We think we are unique in being able to offer you this amazing plant, with extremely important medicinal, protective beneficial effect on the bees. **Ready now!**
